PROFESSIONAL SUMMARY

Early-career Fullstack Engineer with experience across 2 internships, building React/Next.js interfaces and integrating NestJS REST APIs. Project experience includes inventory concurrency control, Redis caching, relational database modeling, and automated CI checks. Strongest in JavaScript and TypeScript, with additional React and ASP.NET Core (.NET 8) experience.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C#

Frontend: React, Next.js, Redux Toolkit, Tailwind CSS, HTML5, CSS3, Responsive Design

Backend: Node.js, NestJS, ASP.NET Core (.NET 8), RESTful APIs, JWT, Socket.IO, Prisma

Data: PostgreSQL, PostGIS, SQL Server, MySQL, Redis, Neo4j

Engineering: Git/GitHub, Docker, Docker Compose, GitHub Actions, CI, Integration Testing, Postman, Linux

WORK EXPERIENCE

MangoAds Co., Ltd. | Backend Developer Intern | Aug 2026 - Present

- Explored the company's system infrastructure and backend architecture to understand how project components and environments work together.
- Supported assigned backend development tasks for company projects while learning the existing codebase and development workflow.

Best HR Solution | Fullstack Engineer Intern | May 2026 - Jul 2026

- Built full-stack features with React, Next.js, and NestJS for an AI recruitment platform supporting JD/CV standardization and candidate-job matching.
- Translated requirements into responsive interfaces connected to REST APIs; tested endpoints with Postman and collaborated through Git/GitHub workflows.

PROJECT EXPERIENCE

LifeHelper | Software Engineer | Personal Project | Aug 2026 - Present

- Designed a 6-service architecture with separate database ownership for identity, productivity, AI, documents, notifications, and analytics.
- Built a NestJS backend foundation using Clean Architecture, Prisma, PostgreSQL, and Redis, with repository abstractions, per-service migrations, and integration testing.
- Automated linting, type checks, tests, Prisma validation, and builds with GitHub Actions CI; integrated OpenAI Codex pull-request reviews.

github.com/dhuyhoang1406/Lifehelper

E-commerce Clothing Platform | Software Engineer | Team of 6 | Sep 2025 - Dec 2025

- Connected React customer and admin workflows to .NET 8 REST APIs backed by SQL Server; implemented optimistic locking to guard inventory updates against concurrent overselling.
- Built a Node.js chatbot with Gemini API and Redis caching to reuse responses and avoid redundant external API requests.

GitHub: ec-project | ec-project-backend

HeritaHub | Software Engineer | Team of 5 | Feb 2025 - Apr 2025

- Built NestJS REST APIs and database schemas for profiles, chat, and heritage sites; integrated a React Native app and Socket.IO messaging. Project earned Top 10 in the WebDev Studios competition.
- Modeled heritage-site relationships in Neo4j to support graph-based recommendation queries.

EDUCATION AND AWARDS

Saigon University | Bachelor of Science in Software Engineering | Sep 2022 - Present

GPA: 3.66/4.00 | Academic Merit Scholarships: 4 semesters (2022 - 2025)

TOEIC Listening and Reading: 705/990 | Aug 2025
